

INTRODUCTION

The Regional Development Plan for NCR (RDP-NCR) contains sectoral assessments and outlines the opportunities and challenges that face each thematic area.

As a development instrument, the RDP-NCR provides a strong basis for the determination of a strategic framework which will effectively guide the identification of priority programs, projects, and policy interventions to operationalize the RDP-NCR. This will ensure the attainment of RDP-NCR development targets in support of President Ferdinand "Bongbong" R. Marcos Jr.'s 8-Point Socio-Economic Agenda, AmBisyon Natin 2040, the Philippine Development Plan 2023-2028, and the 2030 Agenda for Sustainable Development.

During the formulation process of the RDP-NCR 2023-2028, there were several consultations with stakeholders, such as bilateral meetings, workshops or writeshops, and learning events. The draft chapters of the RDP-NCR, which focused on the sectoral assessment and review of opportunities and challenges in the region, served as the working draft for the consultative meetings and writeshops with regional line agencies, private sector, non-government agencies, and the local government units.

REGIONAL DEVELOPMENT FRAMEWORK

Regional development in Metro Manila is anchored on the long-term development vision enumerated in the Metro Manila Greenprint 2030:

“Metro Manila for all; green, connected, resilient; offering talent and opportunity; processing knowledge and delivering services at home and abroad.”

The RDP-NCR 2023-2028 is a medium-term plan that guides the development direction of the region designed to transform Metro Manila into a highly competitive East Asian metropolis sustainably delivering adequate services and promoting higher standards of living, consistent with the overall strategic framework of the PDP.

PLAN IMPLEMENTATION AND MONITORING

The Regional Development Plan - NCR will be implemented through its accompanying document, the Regional Development Investment Program - NCR 2023-2028. The latter document translates the Plan's goals, objectives, and strategies into programs and projects to be implemented within the given timeframe.

Through the interventions of the aforementioned agencies, the Plan's progress will be monitored and evaluated through existing mechanisms. These include the development of the Results Matrices (RM), which harmonizes the indicators of each RDP chapter, the formulation of the Regional Development Report (RDR), which serves as the annual report of the Plan and contains the updates for every chapter, and the formulation of the Regional Economic Situationer (RES), which provides an outlook and assessment of the economic development of the region.

The Plan's implementation, monitoring, and evaluation is crucial as it requires close coordination between and among regional line agencies, local government units, the private sector, and civil society organizations.
